- Proactive management
- Lifetime value based approach

Improve Collections & Recovery Efficiency

- Prioritization of effort
- Cost effective management

STRATEGY

ACQUISITION

PORTFOLIO MANAGEMENT

COLLECTIONS

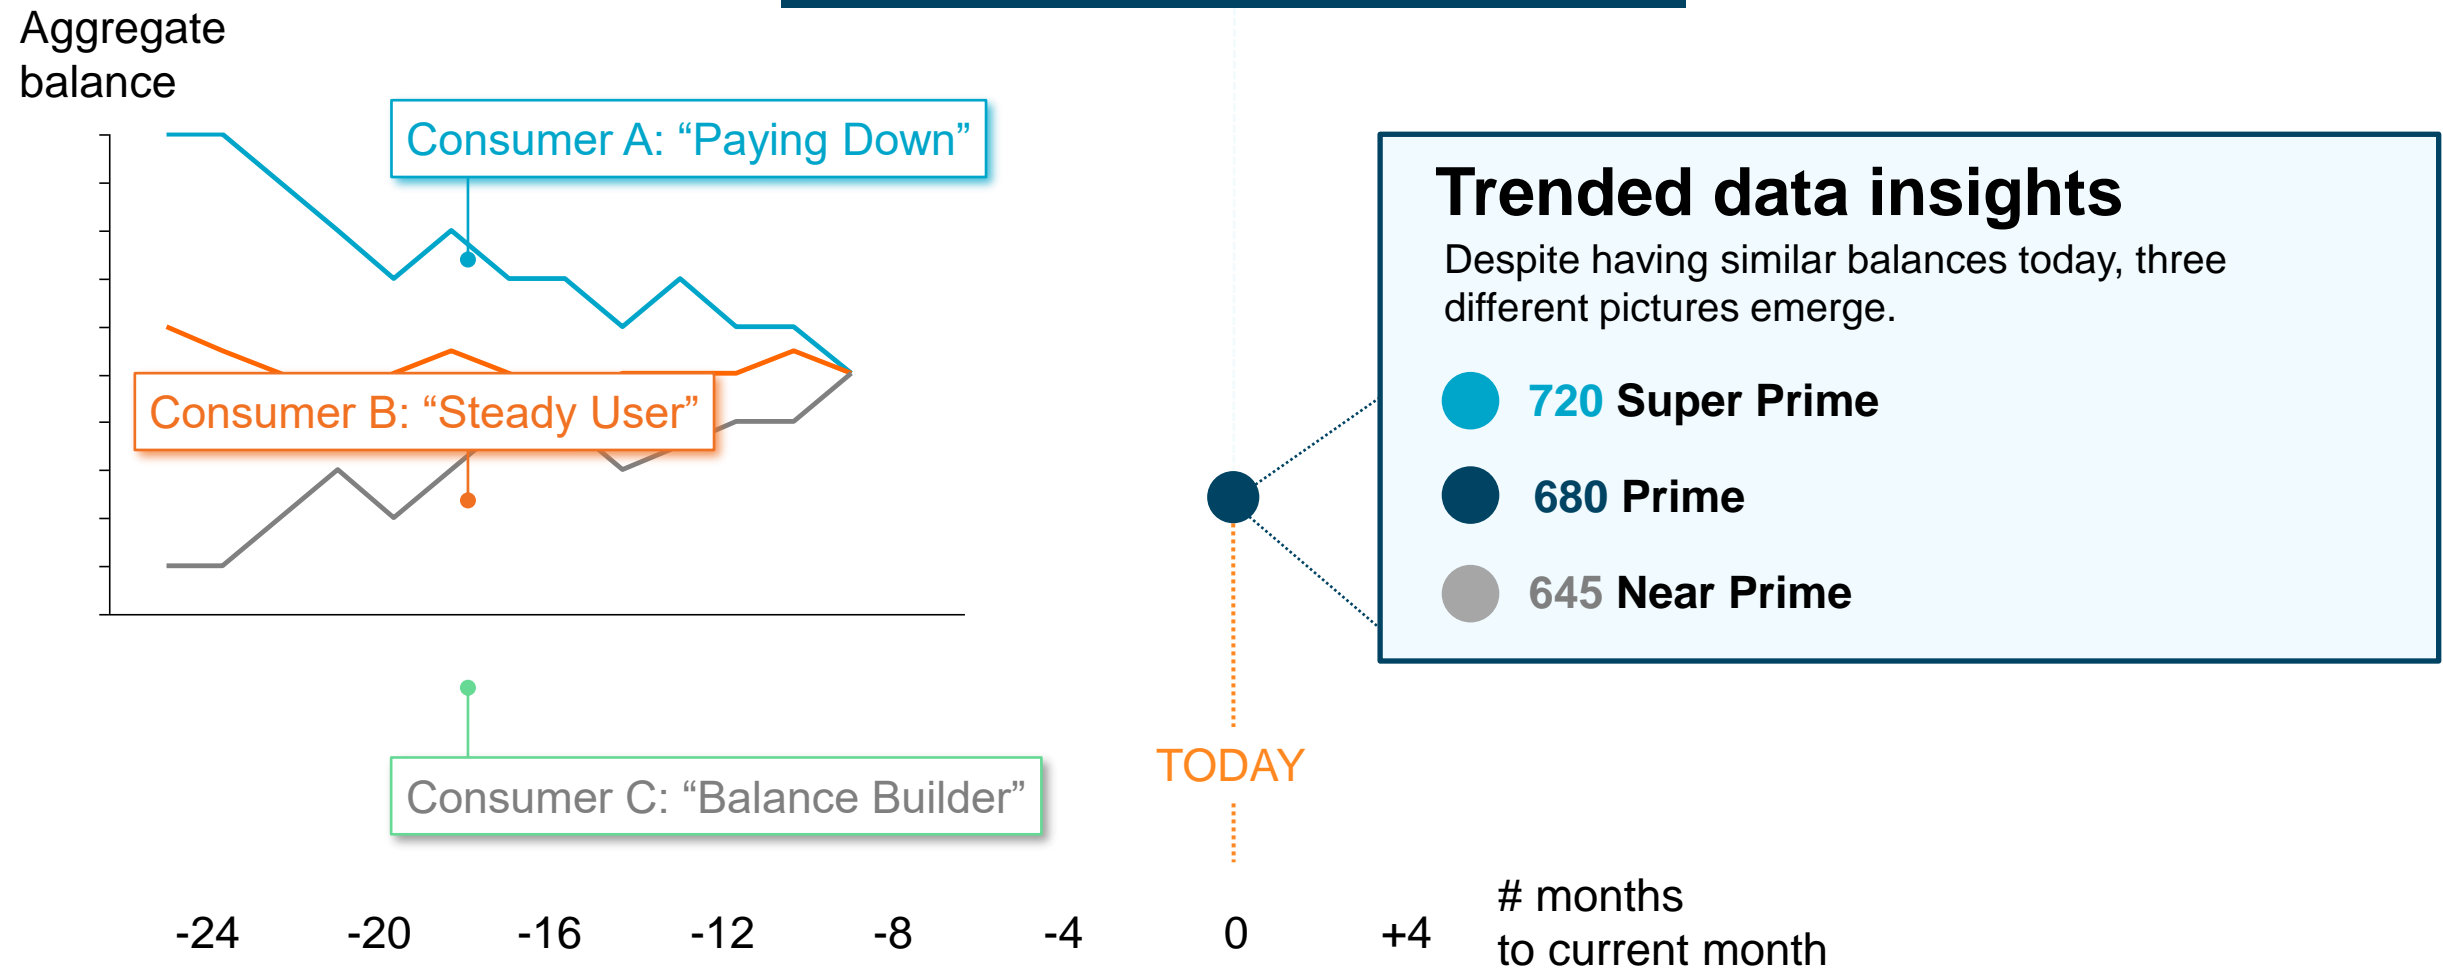

Introducing CV
Trended data
Attributes/Variables

Something as simple as examining balances over time can yield powerful insight

Traditional reports will produce a score of 675 for each of these consumers

360° Consumer Insights

CreditVision consists of 145+ new attributes & algorithms

Spend

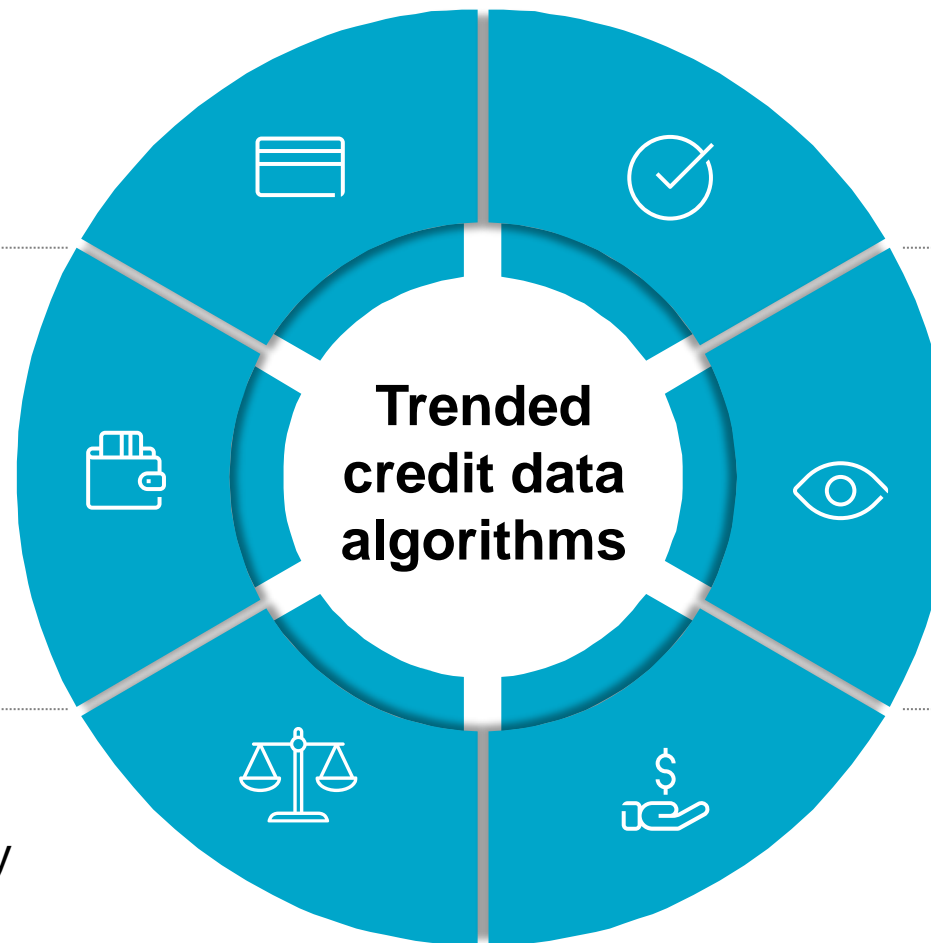

Concentration, velocity, and seasonal measures of total consumer spend

Wallet Share

Captures balance shifts indicative of consumer loyalty to tradelines over time

Balance Magnitude

Index indicative of direction and recency of balance change over past 24 months

General

General insights into consumer behaviour for use across customer lifecycle

Revolver

Categorizes card and retail trades as revolving, transacting or inactive each month and describes related behaviours

Payment

Identifies payment-based behaviours, ex. payment ratios, excess payments, prepayment frequency and amount

Why Trended Data?

Why Now?

Benefits: What CV Will Bring Across The Credit Cycle

Customer Acquisition

- **Increase approval and booking rates** while maintaining or reducing bad debt by more accurately identifying consumers meeting risk objectives
- **Reduce customer friction** by incorporating bureau data and scores into your decisioning model for faster, automatic decision-making

Portfolio Management

- Bringing customers' card to **top of wallet**
- Safely **expanding borrower universe** in a competitive environment by using insights that help you ensure responsible lending and fair treatment of customers

Collection

- Increasing **collections efficiency**
- **Strengthen relationships with customers** by offering appropriate up-sell/cross-sell offers

Market Intelligence

- **Gain a competitive edge** by getting insights from trended data that just can't be seen with traditional credit scores and data

Next Level credit decisioning

Richer Insights

- **Powerful analytics from 145+ enriched attributes and algorithms** extract insights previously unavailable that allow lenders to identify, interpret, and act on specific behaviors or make more confident risk decisions

Score Better

- **Scores and analytics built on richer and more predictive data** than any other scores in the market help lenders make more precise lending decisions to move ahead of the competition

Easy integration into Existing processes

- CreditVision' suite of capabilities ranging from raw data to scores to sophisticated models can be delivered online or in batch. Customers can **easily integrate new and better insights into existing operations**
